DAIKIN SA'S CLASSROOM TRAINING PROGRAM

Empower your workforce with specialist training from Daikin. Our product training is designed to raise standards, set industry benchmarks and help you develop both product and service expertise. You will receive the highest quality training from our experienced instructors to ensure full product confidence. The courses offered are intended for qualified delegates with a foundation of embedded knowledge to benefit from the training offered. Semiskilled applicants are welcome to attend all course on offer however; applicants will be issued with an attendance certificate regardless of the test result.

Daikin know that installation fundamentals and correct work practice are key to reliable systems operation and a happy customer. As such Daikin have decided to merge the **Splits, Sky Air and VRV installation courses into a one**, which will now change from a **one-day course to a two-day course**. The Chiller and Advanced VRV training remain un-affected.

DAIKIN'S NEW CERTIFICATION PROGRAM

Daikin have realized the importance of skilled technicians in the field. As such Daikin have created a Daikin Certified Technician certificate acknowledging the skills of such individual and giving industry recognition.

We will only offer this certification on the R32, VRV, Split and Sky installation.

All delegates attending will be assessed in the form of a summative assessment. Candidates scoring below **70%** will need to rewrite before being awarded with an attendance certificate. Candidates scoring between **70% and 89%** will receive an attendance certificate and candidates achieving above **90%** will receive the prestigious Daikin Approved Technician certificate confirming the required skills, quality and effectiveness to meet Daikin's high standards.

A Daikin Approved technician certificate will only be issued to candidates in possession of a valid safe handling of refrigerants card which has not expired and a valid refrigeration trade. These must be presented when booking or on the training day.

Daikin looks forwards to meeting and seeing you in the classroom.

Daikin Approved Installer – Program Benefits and conditions

- Achieving Daikin Approved Installer status confirms that the individual has demonstrated **above-average written competence** in Daikin-approved installation standards and **best-practice methodologies**.
- This certification helps build customer trust by assuring a **high-quality and reliable installation**, backed by an officially recognized Daikin accreditation.
- Certification also provides broader industry recognition. When consultants request recommendations for companies capable of installing VRV systems, Daikin may prioritize those that employ multiple Daikin Approved technicians. This reduces the need for branch managers to produce individual letters of commendation for consulting engineers.
- The program further benefits **freelance installers**, enhancing their credibility when subcontracting to larger organizations that have secured installation tenders.
- For individuals seeking new employment, Daikin accreditation strengthens their CV and supports their technical profile with potential employers.
- Daikin Approved installers will receive a **credit-card-style accreditation card** containing their photograph, safe-handling number, course details, date of issue, and one-year expiry.

Important Clarifications

- Being a Daikin Approved Installer does not grant permission to independently commission VRV, Applied, Refrigeration or Roof-top packaged system without the presence of a Daikin technician

Safe Handling Certification Support:

- In cases where a technician achieves the required 90% pass mark for the Daikin Approved Installer assessment but does not hold a valid Safe Handling of Refrigerants card, Daikin will provide financial support toward the renewal. Daikin will sponsor 50% of the renewal cost, capped at R1,400.00 per technician. This support is provided to the dealer sponsoring the technician.

TRAINING INFORMATION

ZA.TNG-VRV001.D

R32, VRV, SPLIT & SKY INSTALLATION

Who is it for?

HVAC Technicians (Installers)
HVAC Project Managers

Trainer

Daikin Registered Technician

Duration

2 days

(lunch included) 08h30 – 16h30

Minimum Attendance:

6 Trainees

Course Content

- R32 refrigerant Fundamentals, F gas regulations,
- Airflow and service space guidelines.
- Bad Installation and work practice examples
- Refrigerant pipe work handling and refnests.
- Brazing techniques and guidelines
- Drainpipe work
- Pressure testing techniques
- Communication wiring and power cables guidelines.
- Voltage and Earth Leakage protection.
- Vacuuming techniques and procedures.
- Pre- Commissioning checks.
- Refrigerant charging
- Witten Assessment

ZA.TNG-VRV002.D

VRV ADVANCED TRAINING

Who is it for?

Registered HVAC Technicians

Trainer

Daikin Registered Technician

Duration

2 days

(Lunch Included) 08h30 – 16h30

Students to bring their own electrical test meters for practical PCB testing.

Course content

- VRV System build up and different PCB functions
- System operation and technologies.
- Testing equipment and tools. Testing methods
- Troubleshooting and error codes
- Maintenance and replacement of PCBS
- Compressor testing, replacement and drier core installations.
- PCB checks and testing
- Voltage protection kits
- Written assessment

TRAINING INFORMATION

ZA.TNG-CHILL001.D CHILLER TRAINING ADVANCED

Who is it for?

Skilled HVAC Technicians (minimum of 4 years' experience)

Trainer

Daikin Registered Technician

Duration

2 days
(lunch included) 08h30 – 16h30

Minimum Attendance:

6 Trainees

Course content

- F Gas regulation & new refrigerants •
- Chiller portfolio, Air-cooled and water cooled.
- Water Piping, Pumping & Accessories •
- System Configurations
- Compressors
- Cooling Towers
- Corrosion
- Pre-commissioning checks
- Written Assessment

ZA.TNG-REF REFRIGERATION TRAINING

Who is it for?

Skilled HVAC Technicians (minimum of 4 years' experience)

Trainer

Daikin Registered Technician

Duration

1 Day
(lunch included) 08h30 – 16h30

Minimum Attendance:

6 Trainees

Course content

- F Gas regulation & new refrigerants •
- Product range.
- Installation.
- Pre-commissioning checks.
- System operation
- Written Assessment

TRAINING INFORMATION

ZA.TNG-CONT CONTROLS TRAINING

Who is it for?

Skilled HVAC Technicians (minimum of 4 years' experience)

Trainer

Daikin Registered Technician

Duration

1 days

(lunch included) 08h30 – 16h30

Minimum Attendance:

6 Trainees

Course content

- Introduction to controls for Split and Sky Air
- Introduction to controls for VRV systems.
- Control solutions for small, medium & large premises
- Control solutions for hotels
- Control solutions for technical cooling
- Control solutions for non-standard applications
- Written Assessment

TERMS AND CONDITIONS

CANCELLATION POLICY AND T&C's

Daikin South Africa learning institution reserves the right to make changes/cancellation to the course schedule in case the number of attendees is less than 6.

Cancellations must be in writing; **no shows or late cancellations will result in the full amount being charged for Dealers, DSP's and Partners as indicated on the previous page.**

Cancellations must be made no less than 5 working days prior to the course date.

ASSESSMENT AND CERTIFICATION

At the end of the course students will be required to do a written test on the training they received. The test result will indicate the success of what the student has learnt. To receive an attendance certificate the student will be required to achieve a mark of 70%.

A student achieving above 90% in the installation training will receive a Daikin Approved Installer certificate, provided that the student has a valid refrigeration trade and is also in possession of a valid safe handling of refrigerant certificate. These must be presented on the training day.

Students attending the VRV Advanced training course are to bring their own multimeters.

TRAINING MATERIAL

Students attending our training will have the training emailed to them via WeTransfer.

ADDITIONAL TRAINING

In addition to the training courses and dates detailed above, Daikin will consider tailor made courses on different dates on special request.

PAYMENT

Payment is required in advance.

Purchase orders are required to hold an enrollment, but payment is due prior to the start of the course.

Total tuition fee includes lunch, refreshments and training material.

DAIKIN DOCEBO ONLINE LEARNING PLATFORM

The mission of Daikin is to provide [the highest quality training and information to our valued Dealers and Partners](#), who install, service and repair Daikin equipment and systems.

The Daikin DOCEBO platform is available to external users and *It's Free!*

Getting started is simple. All you need to do, is:

1. Register yourself as a Daikin user and create your own account.
2. Each person will have to sign up individually by supplying their own personal email address and pass code.
3. Select how many persons in your company you feel would benefit from the training.
4. A single person from your company can be made a *power user*. The power user has administrator rights which means you can allocate trainings offered on DOCEBO to your staff. You can also manage and view their progress.

HOW TO GET DAIKIN ID:

- [CLICK ON THIS LINK & SELECT COUNTRY](#)
- Fill in and submit the form
- Wait for email with your account confirmation (1/2 days)

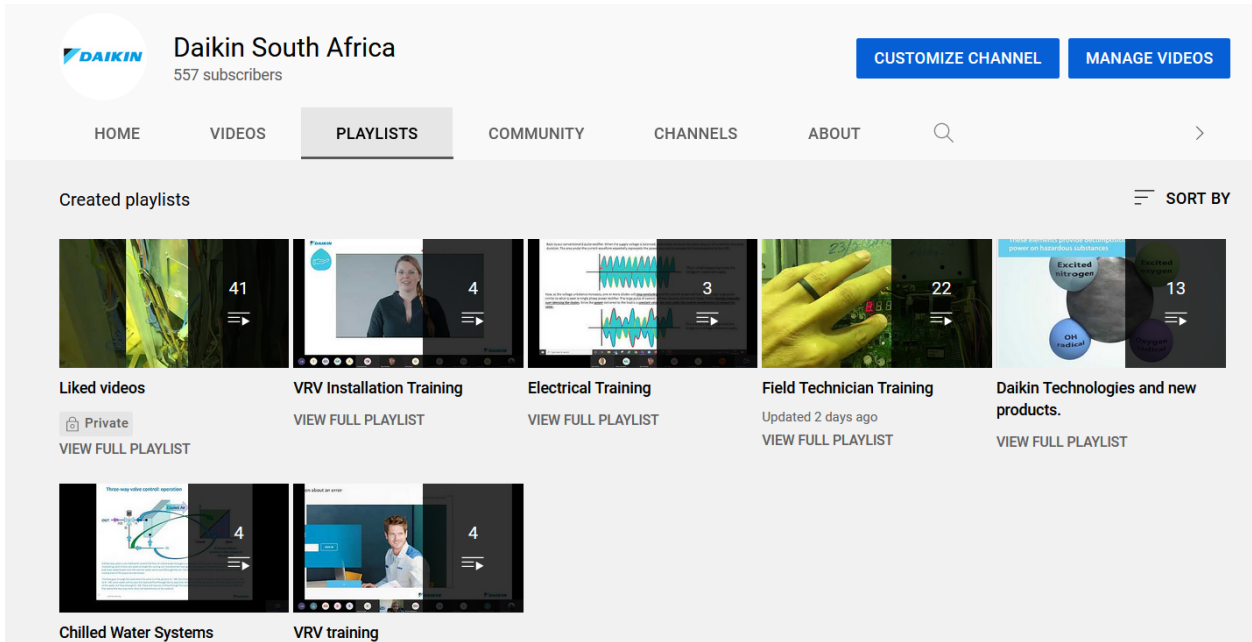

For more information and everything you need to know to get you and your team started on the DOCEBO please e-mail Marc Brotherhood at: brotherhood.m@daikin.co.za.

Further to the DOCEBO platform, Daikin South Africa are proud to promote some more valuable and informative learnings.
